

MIFARE® or HID contactless card reader encoder  
for printers and multifunction copiers fitted with a  
COPICODE-IP

## CARTADIS TCM2-IP

Payment and  
counting of copies  
and printings  
per user

Identifying one's  
firm card on  
printer and MFC

- The **Cartadis TCM2-IP** is connected to a COPICODE-IP and a centralized managing solution for copies and printings. It enables every user to be identified by just brushing his card against the reader and releasing printings to printers or multifunction copiers (featuring the Follow-me option) and get copies made on multifunction copiers.
- The **Cartadis TCM2-IP** is a contactless card reader running with cards (Mifare® or HID) already used in a firm for access control, time control, firm restaurant, etc ... counting every user copies and printings.
- The cards must feature a contactless technology with the Mifare®, Electronic Marin or HID Prox standards.
- **CARTADIS** also has a magnetic card reader (TCMAG1) using magnetic cards matching the ISO 1 - 2 - 3 standard and a bar code reader (TCBK01), having both the same functions as the **Cartadis TCM2-IP** ones.

### Technical characteristics

- Reader accepting Mifare® and HID cards
- Fitted with a power-on indicator and a reading one
- Supplied with a bracket and a connection cable to the COPICODE-IP
- Dimensions : l = 90 mm - d = 35 mm - h = 100 mm    Weight : 180 gr.
